

AIR POLLUTION PREVENTION AND CONTROL POLICY

REF : CEV/Policy/APC

ISSUE : A/02.01.2024

REV: 01/02.01.2024

Page 1 of 1

CEV Engineering Pvt. Ltd. recognizes air pollution as a critical environmental and public health issue. As part of our environmental stewardship and commitment to sustainable development, we aim to monitor, control, and continuously reduce air emissions arising from our operations.

This policy applies to all facilities, operations, contractors, and logistics partners associated with CEV Engineering Pvt. Ltd.

Our Commitments

CEV Engineering Pvt. Ltd. is committed to:

- Identifying and controlling sources of air emissions including particulate matter (PM), NO_x, SO_x, VOCs, and other pollutants.
- Ensuring all emission-generating equipment (e.g., DG sets) is compliant with CPCB/SPCB norms.
- Installing and maintaining air pollution control equipment such as scrubbers, filters, and stacks with proper height and dispersion.
- Regularly monitoring ambient air quality, stack emissions, and indoor air quality as per regulatory and ISO 14001 requirements.
- Promoting a shift to clean energy, electrified equipment, and low-emission transport.
- Engaging employees and contractors in air quality improvement efforts through training and best practices.

Our Targets

- Achieve 100% compliance with stack emission norms at all facilities.
- Conduct ambient air quality monitoring annually at production sites – starting 2024
- Transition 100% of forklifts and internal transport to electric or low-emission alternatives by 2030
- Perform indoor air quality monitoring in production and office areas annually – starting 2024

Implementation Measures

- Conduct periodic emissions audits and maintain records of stack, fugitive, and ambient air emissions.
- Upgrade legacy equipment with cleaner technologies and low-NO_x burners.
- Implement green belt development to act as natural air filters around facilities.
- Optimize processes to reduce VOCs in painting, coating, and chemical use.

Roles & Responsibilities

The EHS & Sustainability Team will oversee air pollution control compliance, monitoring, and reporting. Employees and contractors must follow best practices to reduce emissions and report any violations.

Review & Communication

This policy will be reviewed annually and revised as needed to reflect changes in regulatory requirements, stakeholder expectations, and organizational goals. Updates will be communicated to all relevant internal and external stakeholders.

Young Jin Kim
Managing Director
